

Case Study : ConverzPDF

 **Product Overview** : The platform at your URL is a browser-based PDF merger application developed to simplify document handling by allowing users to combine multiple PDF files into a single document quickly and efficiently.

It belongs to the category of online document management tools, similar in functionality to solutions like Adobe Acrobat online merge tools.

Objective

The core objectives of this platform are:

- Provide free and accessible PDF tools
- Enable quick document manipulation without installation
- Ensure secure processing of user files
- Improve productivity for professionals, students, and businesses

Target Users

1. Professionals

- Merge contracts, reports, invoices

2. Students

- Combine assignments, notes, PDFs

3. Businesses

- Manage documentation workflows

4. General Users

- Quick PDF edits without technical knowledge

◆ 1. Web-Based Processing

- No installation required
- Works across devices (desktop/mobile)

◆ 2. Fast Document Handling

- Optimized for quick upload & processing

◆ 3. Secure File Handling

- No long-term storage (expected architecture)
- Privacy-focused approach

👉 Many PDF tools emphasize privacy by avoiding cloud storage of files

🧠 System Architecture (Inferred)

- **Frontend:** ReactJS (FE = frontend naming)
- **Backend:** Node.js
- **File Handling:**
 - Temporary storage or in-memory processing
- **Deployment:**
 - Cloud-hosted web application
